1.5 min

measured on camera

every figure here covers only these minutes

Measured only where the camera was solved from the pitch's painted lines, replays excluded, with speed averaged over 0.5 s and accelerations over 1 s. These are not match totals. Speed bands: men's (high-speed running ≥19.8 km/h, sprints ≥25.2 km/h for ≥1 s; this module's men's bands (19.8 / 25.2 km/h = 5.5 / 7.0 m/s), 2026-10-10). For scale, an outside reference (SkillCorner open data 1899585 (broadcast tracking, MIT), same definitions at 10 Hz) measures 139.7 m per minute, 12.1% high-speed running, and per minute 0.2 sprints, 0.15 accelerations and 0.38 decelerations.

WHERE HE WAS

provisional · on camera only

THE FOOTAGE · 1.6 MIN

Positions while the camera showed him, one map per half: the teams change ends at half time and which way each attacked is not determined from the footage, so the halves are never added together.

Team A v Team B. ESPN figures are the official full match; tracked figures cover the analysed footage only, on camera only, and are provisional. Generated 10/22/2026.
